

MIKALOR CLAMPS

A robust and reusable hose clamp. For use in applications where a heavier degree of clamping than is offered by a wormdrive hose clip, is needed. Fittings can be securely attached to pressure and suction hoses including PVC, Polypropylene, Rubber, Canvas and all types of flexible ducting.

- Construction:** A low carbon steel CK15 (Din 1.1141) band. Nut and bolt to ISO strength grades 8 (nut) and 8.8 (bolt). Finished in zinc plate - gold passivate. Bevelled edges of the band reduce wear and tear to the hose. A longer nut also makes assembly much easier.
- Identification:** Every Mikalor clamp has its size range (mm) stamped on the band and the new 'Super' trade mark.

Part Number	Range of Adjustment (mm)	Width (mm)	Maximum Height of Clamp (mm)	Part Number	Range of Adjustment (mm)	Width (mm)	Maximum Height of Clamp (mm)	Part Number	Range of Adjustment (mm)	Width (mm)	Maximum Height of Clamp (mm)
